

LEELA MANOHAR REDDY VAJRALA

DATA SCIENCE INTERN

9705127306 | 23131a4460@gmail.com | [LinkedIn Profile](#) | [github.com/manohar-2005-dev](#)

[Summary](#) | [Technical Skills](#) | [Projects](#) | [Certifications](#) | [Achievements](#) | [Education](#)

PROFESSIONAL SUMMARY

Motivated Data Science Intern candidate with strong hands-on experience in **Python (Pandas, NumPy, Matplotlib, Seaborn)**, **SQL (PostgreSQL)**, **EDA**, and **machine learning**. Proficient in building end-to-end data pipelines, performing exploratory data analysis to uncover patterns and insights, and creating data visualizations and dashboards using Power BI and Tableau. Experienced in model building, evaluation, and optimization (Random Forest, Gradient Boosting, Logistic Regression). Strong analytical thinking, documentation discipline, and collaborative mindset. B.Tech Data Science (8.8 CGPA), graduating 2027.

TECHNICAL SKILLS

Python & Libraries:	Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn – data cleaning, preprocessing, EDA, modelling
SQL & Databases:	PostgreSQL, SQL queries, joins, aggregations, subqueries, data extraction & manipulation
Data Visualization:	Power BI, Tableau, Matplotlib, Seaborn, Excel – dashboards, charts, storytelling with data
Machine Learning:	Random Forest, Gradient Boosting, Logistic Regression, model evaluation, hyperparameter tuning
Statistics:	Descriptive statistics, probability, mean/median/mode, hypothesis testing, correlation, distributions
AI & NLP (Bonus):	Hugging Face Transformers, RAG Systems, LLMs, Vector Databases, LangChain, PyTorch
Tools & Cloud:	Git, VS Code, Jupyter, AWS, Firebase, Power BI, Tableau, Excel
Programming:	Python (DSA), C, JavaScript, Node.js

PROJECTS

End-to-End Music Popularity Prediction

[\[GitHub\]](#)

Python / Pandas / NumPy / Scikit-learn / Matplotlib / Seaborn / Random Forest / Gradient Boosting

- Performed end-to-end **data cleaning and preprocessing** on a 227-record Spotify dataset: handled missing values, normalised audio features (danceability, energy, loudness, valence, tempo), and engineered new features for modelling.
- Conducted thorough **exploratory data analysis (EDA)** using Pandas and Seaborn – identified patterns, correlations, and outliers; documented all findings with visualizations and written interpretations.
- Built and evaluated **3 ML models** (Random Forest, Gradient Boosting, Linear Regression); best model (Random Forest) achieved $R^2 = 0.40$ after hyperparameter tuning via GridSearchCV – a 100% improvement over baseline $R^2 = 0.20$.
- Delivered **data visualizations and dashboards**: feature importance charts, correlation heatmaps, and model performance plots using Matplotlib and Seaborn to present findings clearly to a non-technical audience.

Rule-Based Web Research Agent – Automated Data Retrieval & Analysis

[\[GitHub\]](#)

Python / Pandas / DuckDuckGo API / Wikipedia API / Hugging Face T5-small / ipywidgets

- Built an **automated data pipeline** in Python: fetched real-time data from DuckDuckGo & Wikipedia APIs, cleaned and preprocessed raw text (removing noise, normalizing whitespace, chunking), and processed it through an NLP model.
- Documented the entire pipeline workflow, data transformation steps, and output quality analysis – maintaining clear project reports aligned with best practices for team collaboration.
- Delivered structured, consistent **data outputs** from multi-source retrieval, demonstrating practical experience working with live, unstructured datasets and Python automation.

Gen-to-Chatbot – Data Processing & ML Experimentation Suite

[\[GitHub\]](#)

Python / FAISS / FLAN-T5 / Hugging Face / Sentence Embeddings / RAG Pipeline

- Designed and validated **3 distinct ML/NLP systems**: text generation model, semantic similarity engine (embedding-based), and a PDF Q&A chatbot using FAISS vector store + FLAN-T5 (RAG pipeline).
- Performed **model testing and validation** across different input types, documented results, and iterated on model configurations – demonstrating structured ML experimentation and optimization habits.

CERTIFICATIONS

- | | |
|--|-----------------------------------|
| • Data Analysis – GeeksforGeeks | • Machine Learning – Kaggle |
| • Power BI – Office Master | • Artificial Intelligence – Cisco |
| • AWS Cloud Practitioner – GeeksforGeeks | • TensorFlow Badge – Google |
| • Full-Stack Web Development – Udemy | |

ACHIEVEMENTS & EXTRACURRICULARS

- Rank 61 (Advanced Track)** – NEC 2025, E-Cell IIT Bombay, competing among 4000+ teams nationwide.
- NEC Finalist** – IIT Bombay National Entrepreneurship Challenge; demonstrated analytical thinking and strategic leadership.
- Lead** – Entrepreneurship Development Cell; managed team projects, documented initiatives, and drove institutional innovation.
- Participant** – GENAI X NEXTWAVE Hackathon; collaborated with team to build and present a Generative AI solution.

EDUCATION

B.Tech in Data Science – Vignan's Institute of Information Technology, Visakhapatnam

CGPA: 8.8 | 2023–2027

Coursework: Python Programming, Statistics, SQL & DBMS, Machine Learning, Data Analysis, Data Structures & Algorithms, EDA
